

PROCESS SAFETY MANAGEMENT/ RISK MANAGEMENT PLAN (PSM/RMP)

You already know you have to comply with OSHA's Process Safety Management standard and EPA's Risk Management Planning requirements. The question is how to do it without letting it take over your entire job. You may have tried various solutions in the past and been unsatisfied with boilerplate results that didn't fit your facility and weren't workable.

We are experts in refrigeration system compliance and we specialize in the hard parts. We work on standard operating procedures (SOPs), mechanical integrity, code compliance, setting up computerized maintenance scheduling and tracking systems, emergency planning and training and much more. We train maintenance and engineering personnel in PSM and generally accepted good engineering practices to help ensure continuing compliance.

Our PSM and RMP related services include:

Standard Services:

- ◆ PSM Programs
- ◆ Risk Management Programs
- ◆ Process Hazard Analyses
- ◆ Compliance Audits
- ◆ Code Compliance Reviews
- ◆ Standard Operating Procedures
- ◆ Operator Training
- ◆ Contractor Evaluations
- ◆ Emergency Plans
- ◆ HAZWOPER Training
- ◆ OSHA/EPA inspection assistance
- ◆ Worst case and alternative scenario hazard assessments and mapping
- ◆ Homeland Security Registration
- ◆ Tier II filings
- ◆ Welding Procedures
- ◆ PSM/RMP Document Control Panels
- ◆ Mechanical Integrity Quality Assurance Programs
- ◆ Turnkey computerized maintenance scheduling and maintenance history
- ◆ Ammonia water testing
- ◆ Freon Compliance Programs
- ◆ Cascade (CO₂) system safety
- ◆ Full service OSHA training
- ◆ Training in respirator fit-testing
- ◆ Lockout/Tagout programs and training
- ◆ Confined Space programs and training
