

PSM SUPPORT

Process Safety Management is one of the most important standards OSHA has ever written.

It's complex, the fines are big and you have a plant to run too. You don't have to do it alone. Get the help you need when you need it. By using iWorkWise for PSM support, you can have experts on call without paying for them full-time on staff. Get someone on your team that's an expert with Process Safety Management.

You decide what your PSM support will include and when you want to do it. We can do any or all of the following:

- ▶ PHA revalidations
- ▶ Training for key staff
- ▶ Compliance audits
- ▶ Documentation of follow-up on PHA and audit recommendations
- ▶ Site visits for technical assistance and help with document organization

- ▶ Assistance with system changes
- ▶ MOC review
- ▶ Mock inspections
- ▶ HAZWOPER training and drills
- ▶ Respirator fit-testing and training
- ▶ Keep you up-to-date with changing regulations, interpretations and industry improvements.

Let us help you get into compliance with PSM and stay in compliance.
